

This method allows you to link your Okta account to your mobile phone number and send six-digit authentication codes via text message.

## CONFIGURE SMS AUTHENTICATION

1. After logging into SaintsConnect, you will be automatically redirected to the multifactor authentication setup screen. Click the **Setup** button under “SMS Authentication”.

2. In the text box, enter the mobile phone number where you want your security tokens sent.
3. Enter the security token that was sent to your phone.
4. Your Workday home page should automatically load.
