1. Point your browser to the SaintsConnect login page. When prompted, sign into the MyMarymount portal with your MU credentials.

2. After you have signed in, you will see one of four authentication pages where you will be prompted to verify your identity. Follow the on-screen instructions to proceed. If you have not configured your notification preference, please refer to the “Configuring Okta for the First Time” job aid.
3. Note that Okta allows you to set up more than one multi-factor authentication method. If you have configured it this way, click the arrow to open the dropdown menu and choose your login preference.

4. Workday will load and automatically display your home page.
